- **Print design (Do not Mirror) If using print and cut make sure you are printing with registration marks on.**

- **Send to your vinyl cutting machine or trim with scissors around your design. If you do not cut around the design the white area's will show on garment.**

- **Weed the design and apply TTD EASY MASK to the design. This is your Heat Transfer Tape.**

- **Remove the backing sheet and you are ready to press.**

Troubleshooting

Q:My design will not transfer to the mask?

A:This is a sign your machine cut to deep, if you cut with scissors simply turn the design face down and use a weeding tool to hook the backing paper in the corner to begin the release and peel away the backing. For intricate print and cut designs you can work slowly and patiently to release the pieces with a weeding tool. We always suggest test cutting your materials as every machine cuts differently due to quality and life span.

Q:My ink is coming off with the mask after I press it onto the garment?

A:This product is a Cold peel. You need to let the design cool all the way before removing the TTD Easy Mask. If this does not solve the ink transferring I would double check the temperature, pressure and time for this product to make sure the settings are correct.

Application Instructions

Home Iron:

Due to the even distribution of heat needed with this product we do not recommend this method of application.

Easy Press:

Due to the even distribution of heat needed with this product we do not recommend this method of application.

Heat Press:

- Cover design with Teflon Sheet
- Pre-heat Garment for 2-3 seconds
- Apply Design at 350°F/176°C
- Use Medium Pressure for 30 seconds
- Peel Mask Cold

Tips: Do not mirror. Use TTD Easy Mask to transfer off of backing sheet. Do not pre wash garments, and wait 24 hours before first wash. Machine wash cold, inside out with mild detergent. Dry on normal dryer setting. Do not dry clean.
